Phthalate Free

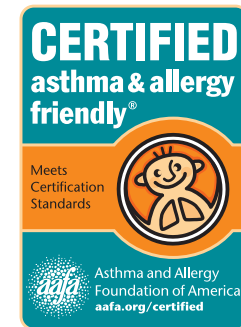

75% Better Tear Resistance

Average tear strength of competitive entry level sheet vinyl versus FiberFloor.

Stands up to kids and pets. The Beyond Tough™ backing protects against rips, tears and gouges.

What is asthma & allergy friendly® certification?

The **asthma & allergy friendly**® certification is a regulated, physician-led certification that accounts for the total installation (product and adhesive) and the ability of a product to be cleaned to minimize the number of allergens released into the environment. This certification helps to set a new standard, and offers consumers a guide for selecting flooring products based on their likelihood to create an allergic or asthmatic reaction.

The top benefits of using CERTIFIED asthma & allergy friendly® products

- 63%** said the products/services reduce their, or their family's exposure to allergy triggers.
- 53%** reported that the products/services improve air quality in their home.
- 47%** believe the products/services are better for their health.**

** METHODOLOGY: AAFA and Research Now conducted an online survey of adults at least 18 years of age who are a current U.S. resident (n=1844) from August 23 and September 12, 2018 to better understand patient and consumer awareness, perceptions and values of certified products and the **asthma & allergy friendly**® Certification Program, as well as buyer behaviors and demands.

TOTAL sample size (n=1844) • Public Survey (representative sample) 1005; AAFA Survey (AAFA constituents) 839
